

Entry Level Civil / Municipal Engineer

Town & Country Engineering, Inc., a Consulting Engineering Firm providing Municipal, Water and Wastewater Engineering Services for over 40 years, is seeking an Entry Level Civil/Municipal Engineer to join our Engineering Team in either our Madison, Kenosha, or Rhinelander office. We encourage upcoming graduates to apply.

As an Entry Level Civil/Municipal Engineer, a candidate will be involved in full range of municipal public works analysis, design, construction, and operation services. Responsibilities will include working with project engineers, project managers, and clients on:

- Utility design
- Street design
- Stormwater design and management
- Construction administration
- Plat and development plan review
- New client development and acting as client liaison

The successful candidate for the Entry Level Civil/Municipal Engineer position should have the following requirements:

- A bachelor's degree in Civil Engineering
- Ability to manage and establish work priorities on a daily basis for projects
- Knowledge and proficiency in Excel and AutoCAD are preferred.
- Construction observation experience from relevant internships is a benefit
- Excellent written and verbal communication skills and be capable of working efficiently with clients, contractors, regulatory agencies, and internal staff
- Any experience in the public works sector will be a benefit

This is an excellent opportunity to work with a quality municipal consulting engineering firm serving clients throughout Wisconsin and an opportunity to grow within the company.

Town & Country Engineering, Inc. offers competitive compensation and benefits.
