WORK AT AN UNDERGROUND GOLD MINE IN ALASKA

We are seeking two Co-Op students to work at our Kensington Mine in Alaska. Our Co-Op program will provide students the opportunity to gain real world, on-the-job experience at Coeur Alaska. Students are mentored throughout the Co-Op by industry professionals and given ownership of projects with a tangible impact on the company

The Co-Op student will be responsible for projects underground, within the milling and water treatment operations, and on surface infrastructure. They will be expected to create solutions to existing challenges underground and on the surface to improve operational safety, environmental performance, and increase overall productivity of the operations.

Coeur Alaska's Kensington Mine is an underground, hard rock gold mine located in the Berners Bay Mining District, which has had over 100 years of resource development.

The mine, which has a small footprint of approximately 240 acres, is accessed via water with the 45-mile commute along Lynn Canal.

WE ARE SEEKING

- Mine Engineer Co-op Student
- Project Engineer Co-op Student

REQUIREMENTS

- Pursuing a degree in Mining, Mechanical, Electrical, or Civil Engineering, or Engineering Technology degree
- Ability to work for 6-8 months starting in early or mid 2025

ABOUT THE JOB

- Hourly position
- Rotational schedule
- Balance of office and field work
- Housing and meals provided while on rotation
- Transportation and hotels covered
