

STEM Forward

What is STEM Forward?

An internship program matching internship candidates with interested companies. Companies in Michigan that are interested in having an intern sign up on the site. Students who are interested in working for one of these companies apply by using the link below.

Fitting into STEM

For Computer Science, you fit into the "Technology" Portion of STEM

How it Works

The State of Michigan provides this program to encourage its companies to hire interns from within Michigan as a step toward full-time employment in STEM-related industries.

Paid Internships

All Internships are paid! The draw for companies is that the company pays for half your salary, and the STEM Forward program pays for the other half.

Win a JBL Flip 6 just by applying!
