

Electrical Community

... Mission Focused

Entry Level Positions are available across our NNL Electrical Community at both our Bettis and Knolls Sites

Our Engineers :

- Design, develop, test, and support shipboard electrical and control systems
- Develop advanced hardware and software
- Perform automated and hands-on testing
- Support and troubleshoot fielded Shipboard I&C systems
- Provide focused I&C system training to Navy personnel
- Develop advanced control systems
- Design and support the facility infrastructure

A single job posting opens the door to all these positions
