

The AAAS Scientific Responsibility, Human Rights & Law Program presents

Responsible AI

Facial Recognition and
Scientific Responsibility

Tuesday, September 10 • 12 - 1 pm

Fisher Hall, Room 125

Facial recognition is becoming ever more pervasive in our society. It can make our lives easier, but many ethical, legal, and human rights concerns exist.

What are the responsibilities of developers and users to ensure facial recognition is transparently, ethically, and justly developed and applied?

Join this Facebook LIVE event with leading experts on facial recognition technology.

Discussion to follow.

Neema Singh Guliani is a senior legislative counsel with the American Civil Liberties Union (ACLU).

P. Jonathon Phillips is an Electronic Engineer at the National Institute of Standards and Technology's Information Technology Laboratory (NIST).

Jessica Wyndham (Moderator) is the Director of the Scientific Responsibility, Human Rights and Law Program and coordinator of the AAAS Science and Human Rights Coalition.
