

Department of Computer Science Colloquium Lecture

*"The Future of Work: How to Stay Relevant
and Competitive in Your Career"*

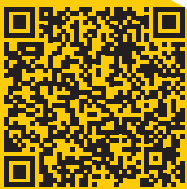

Julie Roell '01

IT Leader, Dow

January 26 • 3-4 pm

Rekhi 214 and Zoom

Talk Abstract and Speaker Bio: In her talk, Julie Roell will reflect on her career path in Dow IT and her key learnings. She will also touch on the challenges for a large organization to keep up with emerging trends and technologies. Julie is an accomplished IT leader with a strong track record of success leading high-performing, global teams in executing operational strategies to achieve business objectives. Currently serving as an IT Leader at Dow Inc., a leading global materials science company, Roell is responsible for overseeing the Application Development Lifecycle and Service Management for a portfolio of applications used in Dow's Manufacturing Operations. With a proven ability to build and lead a highly qualified team of IT professionals, she is committed to driving excellence and delivering impactful results in the ever-evolving world of IT. Prior to her role as an IT Leader, Julie held a variety of roles in Dow I/S, with focuses including software testing, SAP implementation, data migration and mergers, and acquisitions and divestitures. Julie holds a Bachelor of Science in Computer Science with a concentration in information systems from Michigan Tech. She is passionate about diversity and inclusion and learning, growth, and professional/personal development.
