# Grand Rapids Water Education Project

**July 16– 19, 2018**

(Travel dates Sunday 7/15 & Friday 7/20)

**Michigan  
Technological  
University**

## ENGAGE

Hands-on interdisciplinary learning in the classroom, along the trail, and aboard MTU's research vessel, *Agassiz*, sampling plankton, water chemistry, sediment, & benthic organisms. Course focus areas include watershed studies and drinking and wastewater treatment and will provide opportunity to adventure, exploring the natural history and beauty of Michigan's Keweenaw Peninsula.

## INTERACT

with educators, scientists, engineers, and practitioners in the field of water resources and stewardship education.

## GAIN

enhanced ability to teach about water resource topics including watersheds, invasive species, drinking and wastewater treatment, environmental engineering, and stewardship projects using the new Michigan science standards.

## SCHOLARSHIPS

for the 4-day Institute are **provided for all teachers by a grant from General Motors** and include all meals, lodging at MTU's Hillside Place, classroom supplies, & scientific excursions on the *Agassiz*. ***Transportation to and from Houghton is the responsibility of the individual.***

**ONLINE Registration:** [HERE](#)  
or <https://blogs.mtu.edu/cseo/>  
**Application deadline 6/15/18**
