An open networking/pitch social session

National Science Foundation

RFP for ERCs

Let's brainstorm ideas for NSF research center proposals

As many of you are aware, NSF just released their RFP for Engineering Research Centers with a Letter of Intent deadline date of September 25, 2015. Teams are already discussing ideas, so we are hosting an open networking/pitch social session to get the wider campus community involved. Please come join us.

The goal of the ERC Program is to integrate engineering research and education with technological innovation to transform national prosperity, health, and security. ERCs create an innovative, inclusive culture in engineering to cultivate new ideas and pursue engineering discovery that achieves a significant science, technology, and societal outcome within the 10-year timeframe of NSF support.

MEMORIAL UNION

ALUMNI LOUNGE

4:30-6:00 PM

ERC Proposals need to address
the following questions:

What is the compelling new idea
and how does it relate to
national needs?

Why is a center necessary to
tackle the idea?

How will the ERC's infrastructure
integrate and implement research,
workforce development and
innovation ecosystem development
to achieve its vision?

Michigan Tech
