

WHY JOSH STOLE THE PASSWORD: A DECISION NEUROSCIENCE APPROACH TO INSIDER THREAT IN INFORMATION SECURITY

2:00p.m. on Monday, February 8

ROBERT WEST

ELIZABETH P. ALLEN DISTINGUISHED UNIVERSITY PROFESSOR
DEPARTMENT OF PSYCHOLOGY AND NEUROSCIENCE
DEPAUW UNIVERSITY

Cybercrime has a significant impact on nations, corporations, and individuals. Violations of information security can reduce consumer confidence and valuation at the corporate level, and jeopardize social and financial well-being at the personal level. In this talk, I will explore the findings of some of my recent research in order to demonstrate the utility of a decision neuroscience approach to providing insight into the neural correlates of ethical decision making in the context of information security.
