

Foundry Manager

Spring City Electrical Mfg. Co(www.springcity.com), the premier manufacturer in the decorative ornate outdoor lighting industry has an opening for a Foundry Manager. This individual will be responsible for approximately twenty five people including two shift supervisors. These individuals mold, melt, pour and shake out castings weighing between 1 lb. and 1300 lbs. We are a floor-molding operation, utilizing both green sand and no-bake, that pours grey iron, ductile iron and aluminum. This position reports to the Vice President Manufacturing who is the overall plant manager.

The successful candidate will be able to lead people and have superior technical foundry skills. Hands on problem-solving skills, an action orientation and computer skills are also required. An engineering degree and experience in a union environment are pluses, but are not required. The person in this position will have potential for future promotions.

We believe that Spring City is a uniquely attractive company for which to work. Deriving most of its revenue from public infrastructure spending and having a line of new energy efficient fixtures, we believe that we are one of the most securely positioned companies in the foundry industry. Most of the ornate cast lampposts on the streets of New York, Boston, Philadelphia and Washington were made by Spring City. Our sales team is located in the same facility as manufacturing and engineering to provide maximum coordination. The 1000 years that our 95 people have spent with the Company is an indication that people like what they do here. Having been around since 1843, we take a long-term view and value long-term relationships. We are located in a small town 30 miles outside of Philadelphia. Many surrounding communities have affordable housing and good schools.

Our compensation and benefit packages are equal, or better, than any of the large companies in the industry, including generous relocation assistance.
