

**Metallurgist
Position Profile**

OUR CLIENT

Our client, a highly respected 95 year old producer of quality cold rolled strip steel used in products ranging from appliances to motorcycles, has retained us to conduct a search for a Metallurgist. This industry leading company offers the opportunity to perform in a rewarding work environment and competitive benefits including fully paid medical insurance and a 401k match.

POSITION OVERVIEW

The Metallurgist will review and change process methods when necessary. He or she will also review testing procedures to ensure reliability and provide assistance to operators and customers by performing the following duties:

- Coordinate technical liaison services between operations, the sales department, quality assurance and customers with newly developed techniques or practices in processing company products and inform customers of new types of specifications and end uses of products.
- Review customer inquiries to determine if product can be made to their specifications.
- Review and analyze production and quality control procedures, recommend and/or implement revisions.
- Establish quality objectives to meet corporate and customer requirements by appraising the effectiveness of process, testing and inspection methods and quality standards.
- Work with sales and operations to provide assistance with special customer applications an/or claims and adjustments.
- Work closely with raw material purchasing to develop and maintain quality sources.

QUALIFICATIONS

The ideal candidate will have a Bachelor's degree in Metallurgy or Materials Science, possess previous experience in a similar manufacturing environment, and enjoy working on multiple cost containment and/or product development and process improvement projects at the same time.

Additional qualifications include:

- Excellent oral and written communication skills and the ability to interface with customers
- Prior product development or process improvement experience.
- The proven ability to be involved in multiple facets of the operation in an environment of self directed peers and co-workers.
