Dear Sir or Madame:

My name is Artur Bujoreanu, and I represent U.S. Foundry & Manufacturing Corporation in Medley, FL. We are currently seeking a Foundry Engineer for our operation. U.S. Foundry is a cupola melting facility that manufactures products for the municipal casting industry with markets in the Southern, Midwest, and Northern regions of the United States. Our total annual production capacity is 140 million pounds of Class 35A gray iron.

The ideal candidate will have an academic knowledge of foundry technology and equipment with an emphasis on sand systems and molding operations. Project management skills, AutoCAD, and CMM equipment knowledge will be a plus. The candidate must possess a Mechanical Engineering degree or be in the process of obtaining one.

We are interested in developing the candidate into a foundry expert with regard to our foundry equipment and its associated operations.

Please let us know if you have knowledge of any of the former students or current students in the process of graduating that may be interested in a career in South Florida that meet our requirements. You can contact me directly by phone at 786-402-6713 or by e-mail at abujorea@usfoundry.com.

Thank you!

Respectfully,

Artur Bujoreanu
