

Project Manager / CAD / Estimator

This is a full time project management, CAD, and estimating position in a highly technical foundry.

We are seeking an individual with the following skills:

- Mastery of 2D and 3D drafting and modeling is required. Solidworks knowledge is a plus.
- Ability to manage complex projects to completion on time and within budget.
- Ability to work with clients, suppliers, technical and production staff to manage competing priorities in a way that everyone's needs are met.
- Ability to represent our company to our customers in a way that builds confidence in our technical mastery and helps close deals.
- Excellent written and verbal communication skills including understanding the protocols of business communication.
- High mathematical aptitude.
- Mastery of Word, Excel, Powerpoint, and Outlook.

The successful candidate will be managing projects from design and engineering, to estimating, technical assistance with clients, procurement, sampling and production of metalcasting projects. Foundry experience is not required but would be a plus. There is a great deal of customer contact in this position once a project enters your queue. You are a key part of the technical sales process. We expect you to be able to present yourself and our company in a professional manner.

We offer competitive pay including salary and incentive pay. We offer a full benefits package.
