Tooling Engineer Intern/Co-op Position

Waupaca Foundry, is looking for an Intern/Co-op to work with our Tooling Engineering team in Waupaca, WI. We are the largest producer of gray, ductile, austempered ductile, and compacted graphite iron in the world, melting more than 9,500 tons a day. Our castings are produced using our custom built vertical green sand molding machines and created by a workforce that puts generations of expertise to work for our customers every day. Those customers trust Waupaca Foundry for high quality gray cast iron and ductile cast iron parts that are consistently the most durable, reliable, and innovative products on the market.

Waupaca Foundry applies lean manufacturing principals to all processes and extensive continual improvement programs to maintain the highest quality products for our customers.

We apply the best metallurgical science to innovate our processes, create customized technology, and innovate our systems.

Our workforce is the product of generations of foundry knowledge dedicated to making durable products with great pride.

We are committed to long-term sustainability in healthy communities, a clean environment and by encouraging our employees' personal growth through continual advancement.

We are looking for a student to work with our Tooling Engineers on special projects including MAGMAsoft and Arenaflow simulations.
