

# MSE SEMINAR

Materials Science and Engineering  
Michigan Technological University

Friday, April 11, 2014

3:00 pm – 4:00 pm

Room 610, M&M Building

## Open Source Ecology

**Marcin Jakubowski**

TED Fellow & Founder of Open Source Ecology  
Developer of the Global Village Construction Set

Open Source Ecology is a non-profit organization with the goal of designing 50 industrial machines – open source appropriate technologies – that it takes to build a small, sustainable civilization with modern comforts. The idea is that true economic power can be unleashed in developing countries when they gain access to the CAD files, how-to videos and other engineering specs required to make tools to build houses, agricultural equipment, etc.
