

PREP Research Associate

This position is part of the National Institute of Standards (NIST) Professional Research Experience (PREP) program. NIST recognizes that its research staff may wish to collaborate with researchers at academic institutions on specific projects of mutual interest, thus requires that such institutions must be the recipient of a PREP award. The PREP program requires staff from a wide range of backgrounds to work on scientific research in many areas. Employees in this position will perform technical work that underpins the scientific research of the collaboration.

Research Title:

- 688.90 - Chip-scale Doppler Thermometry

The work will entail:

- The candidate will develop compact vapor cells for a new NIST IMS project on Doppler thermometry. She will develop fabrication processes, fabricate cells and test cells for suitability to the project. Candidate will write papers for publication in leading scientific journals and present work at national and international conferences and workshops.

Key responsibilities will include but are not limited to:

- Develop new ideas and processes for fabricating micromachined alkali and alkaine earth vapor cells
- Work in the laboratory to produce cells
- Test cells for suitability for Doppler thermometry
- Write scientific papers and present work at conferences

Qualifications

- **U.S. Citizen Preferred**
- PhD in Physics, Quantum Information Science
- Background in atomic physics and spectroscopy
- Two years of post-doctoral experience

Privacy Act Statement

Authority: 15 U.S.C. § 278g-1(e)(1) and (e)(3) and 15 U.S.C. § 272(b) and (c)

Purpose: The National Institute for Standards and Technology (NIST) hosts the [Professional Research Experience Program \(PREP\)](#) which is designed to provide valuable laboratory experience and financial assistance to undergraduates, post-bachelor's degree holders, graduate students, master's degree holders, postdocs, and faculty.

PREP is a 5-year cooperative agreement between NIST laboratories and participating PREP Universities to establish a collaborative research relationship between NIST and U.S. institutions of higher education in the following disciplines including (but may not be limited to) biochemistry, biological sciences, chemistry, computer science, engineering, electronics, materials science, mathematics, nanoscale science, neutron science, physical science, physics, and statistics. This collection of information is needed to facilitate administrative functions of the PREP Program.

Routine Uses: NIST will use the information collected to perform the requisite reviews of the applications to determine eligibility, and to meet programmatic requirements. Disclosure of this information is also subject to all the published routine uses as identified in the Privacy Act System of Records Notices: NIST-1: NIST Associates.

Disclosure: Furnishing this information is voluntary. When you submit the form, you are indicating your voluntary consent for NIST to use of the information you submit for the purpose stated.
